

## Reels

Reels of film can be supplied in unprinted or printed versions, these are used for both overwrapping and with form-fill-seal applications to facilitate automated packing allowing the product to be packaged with little or no manual handling. This enables food manufacturers to maintain the highest standards of hygiene, whilst also offering production speed and accuracy.

### Popular uses and applications

Reels are ideal for packaging high profile retail products.

#### Popular uses include:

- Food – tea, coffee, sugar, spices, biscuits, confectionary
- Household products – dish cloths, scourers, dusters
- Small retail snack foods – sandwiches, pies, nuts, savouries

### Films materials available

The reels are offered in a wide range of materials and thicknesses that can be printed in up to 8-colours, popular choices include:

- Cellulose
- Biaxially oriented polypropylene (BOPP), co-extruded and coated
- Laminates
- Polythene lined paper
- Paper
- Natureflex™

### Dimensional guidelines

Minimum width 70mm

Maximum width 1,000mm

### Minimum order quantity

Please check for minimum order quantity as this can differ for various materials, but we can usually accommodate small runs.
